ABOUT ME

I am very passionate about self-improvement, paired with a very inquisitive mind. Throughout my work experiences, I have had many situations where my organization and planning skills were put to the limit, and that helped me become a goal-oriented person who constantly strives to use time in the most efficient way.

SKILLS

VOLUNTEER WORK

VOLUNTEER MISSIONARY WORK

The Church of Jesus Christ of Latter-Day Saints
2016 to 2018

Collaborated with a team of around 190 volunteers to mainly teach people in the United Kingdom about Christ and to help the community in any way we could. I also had the opportunity to lead a team of 16 missionaries to achieve the goals of our area.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Universidade Federal de Pernambuco - Recife, PE
Expected: May 2024

Related coursework: Algorithms and Data Structures, Programming in Java, Software Infrastructure.

WORK EXPERIENCE

FULL-STACK DEVELOPER

Facilit Tecnologia SA

November 2021 - *Currently*

I have been responsible for developing many features on a strategic planning platform that is used on a daily basis by over twenty thousand people. All components are made in AngularJS, CSS/SCSS, pure javascript using the best practices, and JQuery.

Additionally, I often join the maintenance team for bug fixing and improvements on legacy code.

I have also spent a fair amount of time making changes to our Restful APIs creating services internally and for our clients.

TECH LEAD

CITi (junior enterprise - UFPE)

December 2022 - June 2023

Responsible for the training and organization of the entire development team (20 people) overlooking several projects and providing technical and management guidance to managers and developers. Also in charge of architectural improvements to our projects to best suit each upcoming project.

WEB DEVELOPMENT INTERN

Facilit Tecnologia

April 2021 to November 2021

Responsible for working on new features for a Strategic Planning Platform as well as doing regular maintenance on the code.

FULL-STACK DEVELOPER

CITi (junior enterprise - UFPE)

December 2021 - December 2022

Full-stack Developer in the top 1 IT Junior Enterprise in the country, doing projects and creating solutions for major companies and small entrepreneurs. I mainly work with ReactJs, NextJs, Typescript, NodeJs, and Docker. I also worked alongside senior companies with large projects.

FRONT-END DEVELOPER

Seed a Bit (junior enterprise - UFRPE)

February 2021 - September 2021

My first experience as a developer, working with vanilla javascript, CSS, and HTML on a junior enterprise at my previous university. I have worked with landing pages and a dashboard for the company's finances.
